The University of Nicosia Medical School Keynote Lecture at the Pantheo Annual Congress 2023

Childhood myopia: Let's not be short-sighted about it!

By Dr Johannes P. Eisenack, MD, F.E.B.O

University of Nicosia Medical School Ophthalmology Lead
Hirslanden Group, Switzerland

22 April 2023 | 10:00 - 10:30

Amathus Hotel, Limassol

ABOUT THE SPEAKER

Dr Johannes P. Eisenack is the Ophthalmology Lead of the University of Nicosia Medical School at Klinik Hirslanden, Zurich, which is part of Hirslanden Group, the largest medical network in Switzerland, comprising 17 hospitals, more than 100 competence centres and over 2,000 doctors. Dr Eisenack graduated with a Doctor of Medicine (MD) in 2006 from the University of Homburg/Saar in Germany, and was trained in various countries, including Sweden and the USA. His research interests lie in the field of retina diseases.

Johannes founded the Bellevue Eye Clinic in Zurich, Switzerland, in 2019, following his passion in children's ophthalmology. He was the head of the department of paediatric ophthalmology, strabology and neuro-ophthalmology at the Eye Clinic City-Hospital of Zurich (Triemli-Spital), from 2015 to 2020. Before that, he was a Leading Consultant for paediatric ophthalmology, strabismus, neuro-ophthalmology and neonatology at the University Hospital and Children's University Hospital, Zurich.

Throughout his career, Dr Eisenack has published in numerous scientific journals and textbooks. He has extensive experience as a lecturer and a keynote speaker, and he is a member of several professional associations, including being a Fellow of the European Board of Ophthalmology (FEBO) since 2012. Johannes is currently training his 2 1/2 years old son how to ski, and his newborn baby how to swim. As a dedicated father and husband, he cherishes the time he spends with his family.
